

FABRIC LIGHT PANELS

ADDLUX 'Frameless' Fabric LED Light Panels are available in a wide variety of sizes and frame depths, ideal for ceiling and wall installation either mounted, suspended or free-standing.

Constructed from one of our high-tech lighting solutions in combination with a suitable aluminium frame and stretch fabric diffuser, the maximum size will depend on which solution is needed for your application.

With a range of frame depths available from 17mm – 180mm, Addlux Fabric Light Panels offer complete design flexibility from overall dimensions, light intensity, colour temperature, controllability and more.
