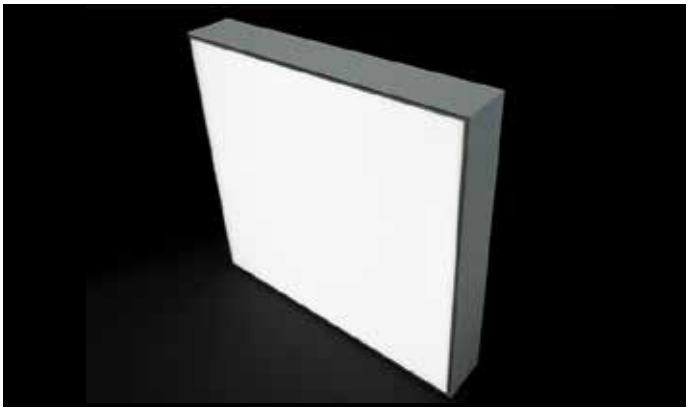
LPTFS90
TENSION FABRIC LIGHT PANEL



The LPTFS90 'frameless' fabric LED light panel is just 90mm thick and comes with a white fire-rated tension fabric diffuser.

The aluminium frame comes in silver as standard but can be powder coated to any RAL colour.

Different brightness levels, white colour temperatures, tuneable white and colour-changing options are available.

The framed LED light panel can be wall or ceiling mounted, or suspended from the ceiling; various fixings are available.
